

Bringing Awareness to Drowning Prevention

[Learn More](#)

On November 30, 2013, Jake Roarke Morrison passed away in a tragic drowning accident.

The Live Like Jake Foundation was created to raise awareness for drowning prevention and provide swim lesson scholarships to those who cannot afford them as well as provide financial and emotional support to families who have lost a loved one or have a child with critical care needs.

“Live Like Jake has been a true blessing to our family. With their assistance, I was able to obtain swim rescue lessons for all three of my children that we could not afford otherwise. With a backyard pool, water safety has always been a major concern, but most safety measures seemed so out of reach with a limited income. We are forever grateful for the gift she has given my children!”

- Tania G.

About Live Like Jake

Jake's Story Our Mission Our Team

Every child is special and Jake was no exception. He almost always had a smile on his face, especially when he met people. He understood humor and had the ability to create his own happiness from all the good and wonderful things this life has to offer. He loved the simple things like lights, fans, frogs, spiders, lizards, shapes, the moon and his favorite thing, pushing his baby stroller around.

On November 30, 2013, while visiting family in New Smyrna Beach, the Morrison's lives as they knew them changed forever. At approximately 6:00 pm the words "Where is Jake" were screamed out and the frantic search for their precious son began. It was pitch dark outside and knowing that their son had fallen off the dock into the Intracoastal and they couldn't save him will forever haunt them. After about 20 minutes of screaming and searching for Jake he was found and taken by ambulance immediately to the hospital where they were not able to revive him.

Not a day goes by that the Morrison's don't miss their little boy. But through the pain and tears they have made it their mission to keep Jake's joyous spirit alive. As a result, the Morrison's established the Live Like Jake Foundation to provide awareness for drowning prevention and SAVE LIVES.

What does it mean to Live Like Jake? Many people can remember how it was to be a child, full of life, fascinated with nature and the world around them...For the Morrison's to "Live Like Jake" means living with no judgments, needing very little to be happy, not getting bogged down with petty things or inconsequential circumstances. Also, for us it means to try and be a positive spark to people we meet and to greet everyone with a smile. You never get over losing a child; you only are only able to get through it and the only way to get through it is by faith. In honor of Jake, the Morrison's try their best to keep a smile on their face, laugh when they can, and do their best to live everyday like their son Jake would have!

Learn About Water Safety

Since 1999, _ children have died from drowning.

Thankfully, parents can play a key role in protecting the children they love from drowning.

[Statistics](#) [Safety Training](#) [Safety Tips](#)

Each year, about 4,000 people drown in the United States; drowning kills more children 1-4 years of age than anything else except birth defects. Among children 1-14, drowning is the second leading cause of unintentional injury death (after motor vehicle crashes). More than half of those who are treated in an emergency department for drowning require hospitalization or transfer for further care (compared with about 6% of all unintentional injuries). A person who survives drowning may suffer lasting consequences like brain damage.
